Preface vii

Memorial Note for H.-D. Beckey viii

Memorial Note for A.G.J. van Oostrom ix

Committees x

Location of Previous International Field Emission Symposia xi

Winners of the E.W. Müller Outstanding Young Scientist Medal xi

List of Attendees xii

THEORY

Theory of field adsorption of hydrogen
X. Ye, H.J. Kreuzer and D.R. Salahub 1

A comment on the relationship between emission field and tip radius for a liquid-metal ion source
R.G. Forbes 9

First principles molecular dynamics study on the electronic structures of the Si(100) surface in electric fields
K. Watanabe, T. Satoh and K. Watanabe 13

Dynamic field (DF)-emission: stability criteria of microscopic field emission sites
J. Mitterauer and P. Till 17

FIELD EMISSION

Experiments on enhanced field emission of niobium cathodes
E. Mahner, N. Minatti, H. Piel and N. Pupeter 23

High current density field emission from transition metal carbides
W.A. Mackie, R.L. Hartman and P.R. Davis 29

Stable field emission and surface evaluation of surface-processed NbC⟨110⟩ tips
Y. Ishizawa, T. Aizawa and S. Otani 36

Atom-probe and field emission electron spectroscope studies of Ge on Ir
M. Ashino, M. Tomitori and O. Nishikawa 43

Field emission from silicon through stable contaminant layers
J. Liu, J.J. Hren, U.T. Son, G.W. Jones and C.T. Sune 48

Observations of work function changes in field-emitter arrays
M.S. Mousa, P.R. Schwoebel, I. Brodie and C.A. Spindt 56

Analysis of some properties of metal–glass microemitters subjected to strong electric fields
M.S. Mousa and D.B. Hibbert 59

Development of knife-edge field emission cathodes on (110) silicon wafers
B. Lee, E.F. Barasch, T. Mazumdar, P.M. McIntyre, Y. Pang and H.-J. Trost 66

Nanometric tips for scanning probe devices
E.I. Givargizov, A.N. Kiselev, L.N. Obolenskaya and A.N. Stepanova 73

FIELD IONIZATION

Appearance energy spectroscopy of field ions
N. Ernst 82

Local field and image effects in field ionization: relative importance
C.M.C. de Castilho, R.F.S. Andrade and C.T. Sousa 97

Local electric fields at individual atomic surface sites: field ion appearance energy measurements
W.A. Schmidt, N. Ernst and Yu. Suchorski 101

On the full-width-at-half-maximum of field ion energy distributions
N. Ernst, G. Bozdech, H. Schmidt, W.A. Schmidt and G.L. Larkins 111

Evidence for reneutralization of field ions generated by electron-stimulated field desorption
J. Dirks, W. Drachsel and J.H. Block 118

Enhanced local electric fields in field ionization at steps of clean and Au-covered Rh(111)
Yu. Suchorski, W.A. Schmidt and J.H. Block 124

Negative ion formation by field ionization on a polymer layer grown by field polymerization of tetracyanoethylene
F.W. Röllgen, U. Schmidt, R. Schmitz and A. Theiss 128

ADSORPTION AND DIFFUSION

Diffusion behavior of Pt adatoms and clusters on the Rh(100) surface
G.L. Kellogg 134

Oxygen-induced reconstruction of Rh{110} and {113} single crystal planes
C. Voss, A. Gaussmann and N. Kruse 142

Electrostatic-field effects on adsorbate bonding and structure at metal surfaces: parallels between electrochemical and vacuum systems
M.J. Weaver 147

Adsorbate-induced structural changes of Rh field emitter tips
N. Kruse and A. Gaussmann 160

The adsorption and dissociation of CO_2 on Rh
M.F.H. van Tol, A. Gielbert and B.E. Nieuwenhuys 166

Oscillatory behaviour of the reduction of NO by H_2 and NH_3 over Rh studied by FEM
M.F.H. van Tol, A. Gielbert and B.E. Nieuwenhuys 179

The adsorption and dissociation of NO on Rh(100) and stepped Rh surfaces
M.F.H. van Tol and B.E. Nieuwenhuys 188

Oscillations in the carbon monoxide oxidation on platinum surfaces observed by field electron microscopy
V. Gorodetskii, J.H. Block, W. Drachsel and M. Ehsasi 198

Surface diffusion of lithium across and along atomic rows on the W(112) plane
T. Biernat, Ch. Kleint and R. Męclewski 206

The interaction of water with surfaces of Pt and Ir field emitters
R. Blaszczyszyn, A. Ciszewski, M. Blaszczyszynowa, R. Bryl and S. Zuber 211

The effect of hydrogen and acetylene processing on microfabricated field emitter arrays
M.S. Mousa, C.E. Holland, I. Brodie and C.A. Spindt 218

SCANNING TUNNELING MICROSCOPY

Single-electron tunneling in double-barrier junctions by scanning tunneling microscopy
C. Schönenberger, H. van Houten, J.M. Kerkhof and H.C. Donkersloot 222

Tip effects and surface modification in scanning tunnelling microscopy
M.E. Taylor, B. Golen, A.W. McKinnon, G.C. Rosolen, S.M. Gray and M.E. Welland 228

Mechanism of transparent STM images of chemisorbed molecules and outermost layers
M. Tsukada, K. Kobayashi and N. Isshiki 235

First principle simulation of STM images of benzene molecules adsorbed on a rhodium surface
N. Isshiki, K. Kobayashi and M. Tsukada 241

STM of the Cu(111)1 × 1 surface and its exposure to chlorine and sulfur
K. Motai, T. Hashizume, H. Lu, D. Jeon, T. Sakurai and H.W. Pickering 246

Field ion-scanning tunneling microscope investigation of sodium adsorption on the GaAs(110)1 × 1 surface
C. Bai, T. Hashizume, D. Jeon and T. Sakurai 252

Structural transformation of the Si(111)(7 × 7)-to-(3 × 1) surface structure induced by sodium
D. Jeon, T. Hashizume, X.-D. Wang, K. Motai and T. Sakurai 257

Adsorption geometry of Na saturation on the dimerized Si(100)(2 × 1) surface
T. Hashizume, K. Motai, H. Lu and T. Sakurai 261

Atomic hydrogen chemisorption on Si(100)(2 × 1) studied by FI-STM
X.-D. Wang, H. Lu, T. Hashizume, H.W. Pickering and T. Sakurai 266

Topography and crystallography of a Pt film on a Cu buffer layer and a Si(111)(7 × 7) substrate
M. Yamamoto, K. Nishikawa, T. Kingetsu, T. Kurumizawa and K. Kusao 275

Fullerene (C_{60}) adsorption on Si surfaces
T. Sakurai, X.-D. Wang, T. Hashizume, Y. Nishina, H. Shinohara and Y. Saito 281

Cs adsorption on n- and p-type GaAs(001)(2 × 4) surfaces
J. Kim, M.C. Gallagher and R.F. Willis 286

ATOM PROBE FIELD ION MICROANALYSIS

An APFIM/AEM characterization of Alloy X750
M.K. Miller and M.G. Burke 292

Atom-probe microanalysis of a nickel-base single crystal superalloy
H. Harada, A. Ishida, Y. Murakami, H.K.D.H. Bhadeshia and M. Yamazaki 299

Grain boundary segregation in nickel base superalloys Astroloy: an atom-probe study
L. Letellier, S. Chambreland, P. Duval and D. Blavette 305

An atom probe characterization of carbon-doped NiAl
R. Jayaram and M.K. Miller 311

An atom probe study of the substitutional behavior of beryllium in NiAl
R. Jayaram, K.F. Russell and M.K. Miller 316

APFIM studies on martensite tempering of Fe–C–Si–Mn low alloy steel
S.S. Babu, K. Hono and T. Sakurai 321

High-strength (5 GPa) steel wire: an atom-probe study
H.K.D.H. Bhadeshia and H. Harada 328

Atom probe and STEM studies of carbide precipitation in $2\frac{1}{4}$Cr1Mo steel
R.C. Thomson and H.K.D.H. Bhadeshia 334

An APFIM study of the microstructure of a ferrite alloy after high fluence neutron irradiation
P. Pareige, J.C. Van Duysen and P. Auger 342

Atom probe and transmission electron microscopy study of reverted duplex stainless steels
F. Danoix, P. Bas, J.P. Massoud, M. Guttmann and P. Auger 348

Characterization of a Σ9 grain boundary in Fe–45%Cr
M.K. Miller and R. Jayaram 356

APFIM studies of some aluminum alloys
S.S. Babu, K. Hono, R. Okano and T. Sakurai 361

Position sensitive atom probe study of the decomposition of a Cu–2.6at%Co alloy
R.P. Setna, J.M. Hyde, A. Cerezo, G.D.W. Smith and M.F. Chisholm 368

An APFIM/AEM investigation of precipitates in model vanadium alloys
R. Jayaram and M.K. Miller 380

Atom probe analysis of sputtered Co–Cr magnetic thin films
K. Hono, Y. Maeda, J.-L. Li and T. Sakurai 386

Atom probe analysis of a nanocrystalline Fe–C–Ta sputtered soft magnetic thin film
K. Hono, N. Hasegawa, S.S. Babu, H. Fujimori and T. Sakurai 391

Atom probe study of the crystallization process of an $Fe_{73.5}Si_{13.5}B_9Nb_3Cu_1$ amorphous alloy
K. Hono, J.-L. Li, Y. Ueki, A. Inoue and T. Sakurai 398

A method for preparing atom probe specimens for nanoscale compositional analysis of metallic thin films
N. Hasegawa, K. Hono, R. Okano, H. Fujimori and T. Sakurai 407

APFIM observations of various forms of HTSC's
A.J. Melmed, P.P. Camus, J. Vargas and D.C. Larbalestier 413

Towards quantitative analysis of $YBa_2Cu_3O_{6+\delta}$ high-T_c superconductor by APFIM
Q.-H. Hu, K. Stiller and H.-O. Andrén 419

The use of moment estimators to determine the parameters of concentration fluctuations in random area atom probe analyses
K.O. Bowman, M.K. Miller and L.R. Shenton 424

Comparison of models for deconvoluting the compositions of coexisting phases
M.K. Miller, K.O. Bowman, A. Cerezo and J.M. Hyde 429

INSTRUMENTATION

Combined electron and ion projection microscopy
H. Schmid and H.-W. Fink 436

On the development of a 3D tomographic atom-probe
B. Deconihout, A. Bostel, A. Menand, J.M. Sarrau, M. Bouet, S. Chambreland and D. Blavette 444

Controlled aperture atom probe design and applications
F. Danoix, M. Bouet, P. Pareige and A. Menand 451

On the performance of a microchannel plate detector used for atom-probe analysis
L. Lundin and U. Rolander 459

Simulation of rapid thermal pulsing for field evaporation
P.P. Camus, D.J. Larson and T.F. Kelly 467

Simulated electron beam trajectories toward a field ion microscopy specimen
D.J. Larson, P.P. Camus and T.F. Kelly 473

Monte Carlo simulation of energy deposition and scattering by fast electrons in a field emission tip
P.P. Camus, M.A. Turowski and T.F. Kelly 481
